

Where the Conversion Leaks Are

allbirds.com · CRO Recommendations · August 2026

The single most valuable conversion mechanism on this site is the product page's add-to-cart CTA, which is currently missing on the Anytime Ankle Sock page, forcing users to abandon or navigate elsewhere. This is bleeding value because the primary purchase action is absent, directly preventing conversions.

9	Controls without accessible names 21 of 69 buttons expose no text label, so screen readers and voice control cannot address them.	High	Low	3/10

#	Finding	Severity	Effort	PXL
10	Images missing alternative text 12 of 55 images carry no alt attribute, losing both assistive technology support and image-search traffic.	Medium	Low	3/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
